

Jobsite Debris Tarp

Rowdy's **ROUNDUP**

Auger Tarp

Faster & Easier Clean Up

New Lewis Canvas Product

This new round Auger Tarp is constructed with the same ruggedness that our Rowdy's DirtBall tarps have become famous for. The Rowdy Roundup fits around a pole similar to our other auger tarps however due to its design, it is easier and takes less people to operate.

Another Hole in One Rowdy!

As a standard design The Roundup Rowdy's Auger Tarp is made of rubberized 22 oz. canvas with a 9.5' diameter and 36" center hole. The construction of the tarp uses double-stitching and the lifting/support straps are run to the center hole for greater support. Each of the 8 lifting/support straps are extended 58" beyond the tarp edge to form the lifting straps. The straps are made of heavy-duty 2" tubular nylon webbing and are fitted with 3" D-Rings. The overlapping slit on the side is secured using hook-loop closures and heavy-duty quick-release buckles. The Tarp is marked to identify the "UP" and "Down" side of the tarp.

When hole is ready for backfilling simply attach the D-Rings to a boom crane hook and allow dirt to backfill slowly and evenly around pole. This is a huge ergonomic advantage and lessens the number of people required to complete the job. In addition your worksite dirt remains largely contained in & around the pole hole enhancing customer satisfaction.

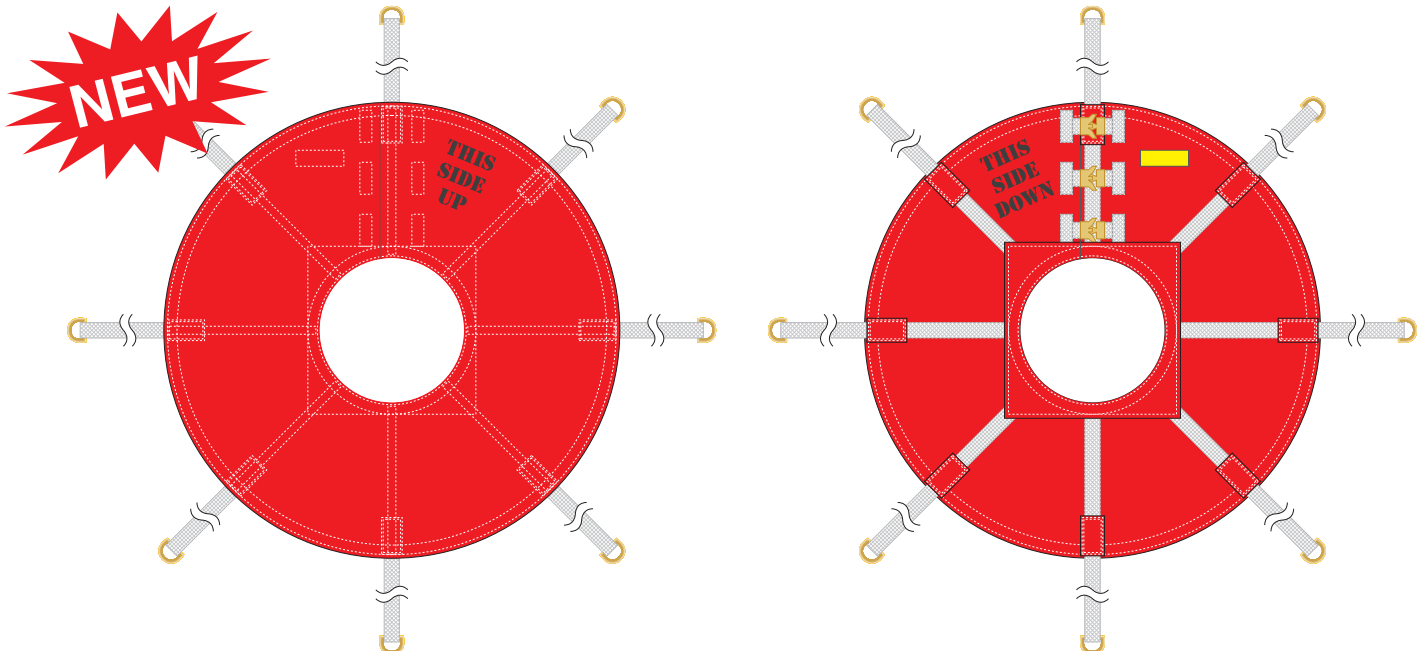

Maximum Work Load 1000 lbs.

Optional Colors:

Gray, Red, Blue, Black and Orange

*Part No.	Size	Material	Hole Size	Strap Length
RDBR-A-36-9.6-22	9.5' Dia.	22 oz.	36"	58"
